

One Stop Shop

Photos taken from official opening of a public payment toilette in Kasese, Western Uganda, build and run by DMS Africa in Joint Venture with Enviclean from Denmark, an Ugandan partner and Ugandan Red Cross.

The One-Stop-Shop public toilette is a state of the art facility built as proof of concept to test that it is possible to operate a sustainable payment toilette in Uganda which is clean, have running water and electricity at all times.

The project is not an aid donation, but to test the commercial sustainability. Its partnered with Red Cross which then at the same time runs awareness campaigns on the importance of handwash.

Please ask for us for more details on the business concept.
